

# **LAGOS STATE SCHOOL CENSUS REPORT 2010-2011**

Lagos State Ministry of Education

## **Foreword**

Data are facts that are usually generated through questionnaires, extracts from records and observations. The collection of data for the 2010/2011 schools census started with the development of appropriate questionnaires (one for the public schools and the other for the private schools) for the purpose of getting relevant and accurate data geared towards planning needs. The baseline questionnaire used in the past was shortened and drastically changed to meet these needs. Census personnel were trained on the administration of the questionnaires and a new method of data collection was used: Enumerators interviewed head teachers/principals and confirmed the information that was given rather than leaving teachers to interpret the forms.

The Ministry received support from ESSPIN (Education Sector Support Programme in Nigeria) on capacity building of the different levels of officers that assisted in the data gathering and analysis. Support in terms of funding also came from ESSPIN for the conduct of private school census.

The summary of the analysis presents the teacher-pupil/student ratios, classroom pupil/students ratios, pupil/student per toilet, promotion rates, repetition rates, dropout rates, survival rates, availability of facilities and population projections to mention a few.

One great advantage of the report is that, comparison can be made between the public and private data. Other advantage is the comprehensiveness of the report which revealed that the State has the largest number of private schools in Nigeria.

It is my pleasure therefore to present the report to users in the formulation of policy, conduct of research work and planning activities.

**Dr. G.O. Shodimu.**  
**Policy, Planning, Research and Statistics.**

## **Preface**

The Lagos State Ministry of Education is currently implementing the Education Sector Plan 2009-2018 to improve the quality of education in the State.

The annual school census is one of the main tools providing information to assess progress in the implementation of our Education Strategic Plan using a set of monitoring indicators.

The current report presents the findings of the 2010-2011 school census. I am certain that the report will serve as an authentic source of information on the status of education in Lagos.

I wish to congratulate the Department of Planning, Research and Statistics and the education officials at all levels of government down to the school level who contributed towards the implementation of the school census and the preparation of this report.

Permanent Secretary.

State Ministry of Education

August 2011

## **Executive summary**

The State Ministry of Education in cooperation with the State Universal Basic Education Board (SUBEB) and the Secondary School / Science and Technical Schools Board with the support of the Education Sector Support Programme in Nigeria (ESSPIN) carried out the school census in November 2010.

The purpose of the school census is to provide yearly data to effectively monitor the state of the education sector and facilitate the use of information for planning and budgeting decisions.

The State Ministry of Education has put great emphasis in ensuring that the results of the school census are reported in a timely way to the public.

## Definitions

**Dropout rate by grade:** Proportion of pupils from a cohort enrolled in a given grade at a given school year that is no longer enrolled in the following school year.

- To measure the phenomenon of pupils from a cohort leaving school without completion, and its effect on the internal efficiency of educational systems. In addition, it is one of the key indicators for analysing and projecting pupil flows from grade to grade within the educational cycle.

**Gross enrolment rate:** Total enrolment in primary education, regardless of age, expressed as a percentage of the eligible official school-age population (6-11 years in Nigeria).

- To show the general level of participation in primary education. It indicates the capacity of the education system to enrol students of that age group. It can also be a complementary indicator to net enrolment rate by indicating the extent of over-aged and under-aged enrolment.

**Gross intake rate:** Total number of new entrants in the first grade of primary education, regardless of age, expressed as a percentage of the population at the official primary school-entrance age (6 years in Nigeria).

- To indicate the general level of access to primary education. It also indicates the capacity of the education system to provide access to grade 1 for the official school-entrance age population

**Net enrolment rate:** Enrolment of the official age group for primary education (6-11 years in Nigeria) expressed as a percentage of the corresponding population.

- To show the extent of coverage in a given level of education of children and youths belonging to the official age group corresponding to the given level of education

**Pupil-teacher ratio:** Average number of pupils (students) per teacher at a specific level of education in a given school year.

- To measure the level of human resources input in terms of the number of teachers in relation to the size of the pupil population. The results can be compared with established national norms on the number of pupils per teacher.

**Repetition rate by grade:** Proportion of pupils from a cohort enrolled in a given grade at a given school year who study in the same grade in the following school year.

- To measure the rate at which pupils from a cohort repeat a grade, and its effect on the internal efficiency of educational systems. In addition, it is one of the key indicators for analysing and projecting pupil flows from grade to grade within the educational cycle.

## **Abbreviations**

ASC	Annual School Census
EMIS	Education Management Information System
GER	Gross Enrolment Rate
NER	Net Enrolment Rate
SBMC	School-Based Management Committee
SMOE	State Ministry of Education
SUBEB	State Universal Basic Education Board

# **1 Background**

The Nigeria Educational Management Information System Policy, which was approved by the 54<sup>th</sup> National Council on Education meeting in Katsina in December 2007, envisaged the decentralisation of the system in 2009: “different states are now required to set up, staff and furnish education management information systems for their respective states”. The Policy document determines some coordination principles (in terms of organisation, operations and the transition period). These are further explained in the Implementation Guidelines for the NEMIS Policy that was disseminated in August 2009.

The National EMIS Committee, convened in August of 2009, approved the ASC Operational Manual, which is based on a census cycle that runs yearly from August to July. The Operational Manual includes guidance for every ASC phase and a timeline. Additionally the National EMIS Committee also approved a simplified ASC questionnaire (8 pages long for the public sector) and an even shorter form for private schools (4 pages long). It was approved that the Education Sector Support Programme in Nigeria (ESSPIN) would provide new, simple and easy-to-use data entry software designed for the newly adopted questionnaires which would be made available to all states, and lastly, November 16<sup>th</sup> was selected as the start date for the week of data collection.

This national meeting was followed up by the Lagos State EMIS Committee meeting, during which the committee decided on major changes to the way that the Lagos census would be conducted, meaning a break from the past methods. In 2011 trained enumerators were used to fill in the form while sitting with the school’s head teachers, who would supply all data needed. Field coordinators were trained to organise and oversee the work of enumerators, and ensure that forms were correctly and completely filled before being returned to the SMoE and SUBEB. Additionally, a Core EMIS Committee was instituted in the state, which was responsible for planning the census, meeting several times in the months leading up to the data collection, and members were also responsible for ensuring that enumerators and field coordinators fulfilled their duties.

Forms were returned to the SMoE and SUBEB in a fairly timely fashion. Data enterers were trained in both EMIS units, and after a delay in getting the IT infrastructure operational, data entry commenced and was completed in approximately one month. Data was cleaned and data analysts were trained; capacity of data enterers and analysts was raised with the support of ESSPIN, although there is still need for more such capacity building during the coming cycle. As a result of these efforts, state officers were able to accurately generate the tables in this report. The content of these tables were checked and double-checked to ensure accuracy.

This report presents an overview of Lagos public and private school system, with the intention that this information will be used in planning across the education sector, and will cut down on the need for ministries, departments and agencies collecting their own data. As the methods for conducting this census constitute a complete break from the past, this report should be viewed with confidence, and is presented with the pride of Lagos State.
